MEMORANDUM REGARDING DAMAGES DUE TO HEAVY SNOWFALL/RAINFALL, SNOW AVALANCHE AND FIRE, 2022

State Profile

Physical Location:

Himachal Pradesh is predominantly a mountainous State located in North – West India. It shares an international border with China. The State has highly dissected mountain ranges interspersed with deep gorges and valleys. It is also characterized with diverse climate that varies from semi tropical in lower hills, to semi arctic in the cold deserts areas of Spiti and Kinnaur. Altitude ranges from 350 meters to 6975 meters above mean sea level. It is located **between Latitude 30° 22'.40" N to 33° 12'.20" N and Longitude 75° 45'.55" E to 79° 04'.20" E.**

Demography:

Population of Himachal Pradesh is 68.56 lakh persons as per the Census report for the year 2011. 89.01% of the total population inhabits 20,604 villages in the rural areas of the State. These villages are sparsely distributed across the State having population density as low as 1-2 persons per square kilometer in the remote and tribal area of Lahaul & Spiti, Hamirpur district has largest population density of 369 persons per square kilometer as against 123 persons per square kilometer for the whole State. Himachal Pradesh is one of the few states of the country where gender equality is an integral part of the social ethos as well as the overall development strategy. Female literacy is well above the national level and women employment is much higher than in most states of the country.

Source: Census of India.

Administrative Units:

In order to make the functioning smooth, the State is divided into twelve districts which are grouped in three Revenue Divisions i.e. Shimla, Mandi and Kangra. There are 73 Sub Divisions, 109 Tehsil, 63 Sub-Tehsil, 79 Development Blocks and 3226 Panchayats. The State has very effective structure of PRI's comprising 12 Zila Parishads and 78 Panchayat Samitis. There are also 30 Municipal

Councils and 23 Nagar Panchayats, besides 7 Cantonment Boards and 2 Municipal Corporation in the State.

Topography:

Topographically, the state can be divided into three zones:

- 1. The Shiwaliks or Outer Himalayas:** It covers the lower hills of Kangra, Hamirpur, Una and Bilaspur, lower parts of Mandi, Solan and Sirmour districts. Within this zone, altitude varies from 350 m to 1500 m.
- 2. Inner Himalayas or mid-mountains:** Altitude varies from 1500 m to 4500 m above mean sea level and includes areas such as the upper parts of Pachhad and Renuka in Sirmaur district, Chachiot and Karsog tehsils of Mandi district and upper parts of Churah tehsil of Chamba district.
- 3. Alpine zone or the greater Himalayas:** Has altitude above 4500 m above mean sea level and comprises areas of Kinnaur district, Pangi tehsil of Chamba district and area of Lahaul & Spiti district.

Geology & Geomorphology:

Himachal Pradesh with its complex geological structures presents a complicated topography with intricate mosaic of mountainous ranges, hills and valleys. Composed of recent Alluvium, Shiwalik hills are made up of rocks such as sandstone, shale and clay that came into existence during the Eocene, Miocene and Pliocene period.

The central part that extends from Chamba district in the north to Shimla district in the south is mainly represented by Jatog group of rocks which originated in middle Proterozoic period. In the north eastern portion unclassified Granites borders the central part in between Kullu, eastern Shimla, Lahaul Spiti and parts of Kinnaur district. The eastern greater Himalaya presents the Triassic formation which is found in Kaza tehsil of Lahaul Spiti district. The oldest rocks are Granites found at Jeori-Wangtu and Bandel near Largi in Kullu district. These granites date back to a stage of the crust at a time when India was located 8000 Km southwest of its present position.

Figure 1.2 Geography of Himachal Pradesh

Figure 1.3 Geological and Mineral Map of Himachal Pradesh

Climate:

The climate varies across the state with the altitude. In the southern low tracks between an altitude of 400-900 it is hot sub humid type, between 900-1800m altitude warm & temperate, between 900-2400 m cool & temperate, cold alpine & glacial above 2400-4800 m altitude. Bilaspur, Kangra, Mandi, Sirmour, and Una districts experience sub tropical monsoon, mild and dry winter and hot summer. Shimla district has tropical upland type climate with mild and dry winter and short warm summer. Chamba district experiences, humid subtropical type climate having mild winter, long hot summer and moist all season. Kullu district experience mainly humid subtropical type of climate with mild winter moist all season, long hot summer and marine. During the period from January to February heavy snowfall in higher reaches create conditions for low temperature throughout the state making it unpleasant and series of western disturbances also affect the state.

Table 1.3 Climate Pattern of Himachal Pradesh

Climate Pattern	Districts
Sub-tropical Monsoon (Cwa type) Mild and dry winter, hot summer	Bilaspur, Kangra, Mandi, Sirmour, Una, Hamirpur, Solan, Chamba
Sub-tropical Monsoon (Cwb type) Mild and dry winter, moderate hot summer	Shimla, Parts of Chamba
Sub-tropical monsoon (Cfa type) Without dry winter with hot summer	Chamba, Major parts of Kullu, Mandi

Sub-tropical monsoon (Cfb type) Without dry winter with moderate hot summer	Minor parts of Kullu
Humid continental (Dwb type) Severe and dry winter, warm summer	Kinnaur
Humid continental (Dfb type) Severe winter moist all seasons, short warm summer	Lahaul & Spiti

Land use:

As per Land use statistics, Ministry of Agriculture (GoI), 2005, about 12.21 percent of the total reporting area of 4547000 ha of the state (out of 5567000 ha. of geographical area) is under cultivation. 24.06 percent under forest. Permanent pastures and other grasslands account for about 33.63 percent, 1.25 percent land under miscellaneous tree crops and groves, 2.73 percent is under the cultivable wasteland, fallow land other than current fallow 0.29 percent, current fallow 1.19 percent and net sown area is 12.21 percent.

Rivers and Catchments:

Five perennial rivers Satluj, Beas, Ravi, Chenab and Yamuna flow through the state. The utility of these rivers though restricted considerably by the rugged and undulating terrain of the State, nevertheless, these rivers possess immense potential for the generation of hydro-electricity. The following river catchment areas fall in the State. Figure 1.5 land use in Himachal Pradesh

Table 1.4 River Catchment Areas in Himachal Pradesh

Name of River System	Area of Catchment	Area in percentage
Sutlej	20,398	30.69%
Beas	13,663	24.50%
Chenab	7,850	14.20%
Yamuna	5,872	10.60%
Ravi	5,528	09.90%
Indus	1,450	02.60%
Markanda	360	00.60%
Ganga	290	00.50%
Ghaggar	262	00.50%
TOTAL	55,673	100%

Lakes/Reservoirs:

The state has both manmade and natural water bodies located in different parts of the state for specific purposes viz. irrigation, hydro-electricity, and flood control. Some of the important reservoirs of the state are Govind Sagar, which spreads into the Bilaspur and Una districts, Pong Dam in Kangra, and Pandoh in Mandi District. Chandertal, Renuka and Manimahesh are some the important natural lakes of the state.

Health:

The State has an extensive network of health care institutions. There are 86 hospitals, 2084 Sub- centres, 91 CHC's/RH, 576 PHC's, with available bed capacity of 12527. Similarly, there are 33 Ayurvedic hospitals, 1175 dispensaries/health centres with a bed capacity of 941 available in the state. Besides, there are 3 Ayurvedic Pharmacies and 1 Research Institute. Birth and death rate in the state is 22.1 per 1000 and 7.2 per 1000 respectively (statistical Year Book of H.P.-2017-18).

Roads and Bridges:

As per 207-18 data, the state has total road length of 37131 Kms in which motor able double lane is 2453 km, single lane is 32940 Km, Jeep able 369 Km and less than Jeep able 1396 Km and there are 1365 bridges. About 18156 villages are connected with roads.

Current Disaster

LOSS CAUSED DUE TO HEAVY SNOWFALL/RAINFALL, SNOW AVALANCHE, LANDSLIDE AND FIRE, 2022.

Himachal Pradesh suffered major loss and damage in the winter season due to heavy snowfall, avalanches, landslides, and heavy rains. The State has experienced 6 Spells of Heavy snowfall in the month of January and February causing huge losses to the public & private properties. Based on MHA Relief Norms, the State has assessed losses and damages amounting to Rs 256.81crore. The details of the same areas under:

Extent of damages:

The damages are detailed here under:

1. **Human lives lost:** During this winter season 194 peoples lost their lives due to landslides, lightening, fire and accident etc. Ex-gratia payment @ Rs.4.00 Lacs per head in this regard has been assessed at Rs. 7.74 Cr. Details of 194 Nos deaths & 365 Nos peoples seriously injured due to various disasters is available is at **Annexure – I**. Total loss on this account has been assessed **Rs. 7.74 Crore**.
2. **Animals Husbandry :** A total **92** animals died; which includes sheep, goats, cows, horses and buffaloes etc. In the State had different incidents happened with lightening, Landslide etc. Besides 20 Hens had died due to landslide. In this season, the loss has been assessed as **Rs. 0.13 Cr (Appendix-VI)**.
3. **Structures damaged:** Due to the peculiar Monsoon on various disaster, a number of houses and others assets suffered moderate to severe damages. The details are as under:-
 - Fully damaged Kaccha and Pucca houses - **32**
 - Severely damaged Kaccha & Pucca houses - **97**
 - Cowshed, gharats, shops and labor sheds – **89**
 - Total** - **218**Loss on this account has been assessed as **Rs. 2.09 Cr.**

4. Damage to roads:

During rain and snow in winter season in the State, heavy snow and prolonged rainfall continued almost till the end of February, 2022, the roads in the state got damaged extensively and except for clearance/opening of closed road through mechanical and manual mode, other major repair works could not be attended on priority due to rains. The cross drainage structures and drains got blocked at lots of locations and many of these could not be cleared immediately because of various limitations which resulted in overflowing of water on to the road surface causing extensive damages to the road crust, retaining and breast walls, culverts and other road infrastructure etc. Further, most of the roads run along rivers and their tributaries. The flash floods and cloud bursts in the region further aggravated the damages to the roads especially which run along the rivers, particularly falling in the catchment area of major rivers like Satluj, Beas, Giri, Markanda, Pabbar and Ravi etc. Even at many locations long stretches of roads were washed away or settled requiring immediate intervention and construction of temporary diversions. For flow of traffic.

The Public Works Department took up the restoration works of roads on war footing for which machinery like Dozers and Excavator-cum-Loaders (JCB) were deployed, besides its labour force to clear the blockade.

Directions were issued to all field units to hire private machinery for opening of blockades, where departmental machinery was inadequate.

The staff and officers of the Public Works department worked round the clock to restore the damages and for opening of roads. All the field staff were asked not to avail any kind of leave during monsoon season. The restoration work was daily monitored at Govt. level and by all the senior officers of the department. In fact the active participation of the officers and staff of PWD provided good results this year and the blockades from most of the roads were removed immediately and the roads were not allowed to remain blocked for long period. Immediately after winter season, the department expedited the repair & maintenance activities of the damaged

roads on war footing and made all efforts to complete the restoration process on priority for convenience of general public.

The State Public Works Deptt. assessed the total amount of damages caused by heavy rains and snow as Rs.146.83 Crores (except NH). The State Govt. made available funds amounting to Rs. 39.85 Crores from State Disaster Relief funds, (instead of Rain and Snow damages i.e. Rs.649.94+146.83=796.77) besides advising the PWD field units to take up restoration works by utilizing the normal maintenance funds available with them. Consequently, the department has already spent Rs. 35.50 Crores on restoration of damages caused to the Roads & Bridges, with a result that as on today the PWD has been able to remove slips from most of the roads besides repairing damaged walls and culverts and carrying out heavy patch work on the roads. In addition, the works about to Rs. 106.98 crores are in progress and are being executed for which payments are yet to be made and the pending bills yet to be cleared as and when the additional funds are made available.

(Rs. 146.84 Crore)
(Annexure-II)

5. Damage to Irrigation and water supply schemes:

There had been heavy snow fall/rain fall in various parts of the State during the winter season-2021-2022. Heavy loss to the Government infrastructure as well as to the Jal Shakti Schemes in the State has been reported. The heavy snowfall/rain fall have led to huge/extensive damages to the Water Supply and irrigation schemes of the Department.

Jal Shakti Department is maintaining 9526 Water Supply, and 2669 Irrigation schemes in Rural and Urban areas of the State. During the current winter season a total 3488 schemes (2808 Water supply, 661 Irrigation, 6 Flood Control and 13 Sewerage schemes) were damaged and total loss in terms of money has been estimated as Rs.90.87 Cr.

The Circle wise details of schemes affected/damaged due to heavy snow fall/rains is as under:-

(Rs. In Crore.)

District-wise details of schemes damaged due to heavy rains during current Monsoon-2021			
Sr. No.	District	No. of schemes affected/damaged	Amount
1.	Chamba	371	15.66
2.	Dharamshala	0	0.00
3.	Nurpur	89	4.15
4.	Sunder Nagar	727	15.67
5.	Kullu	182	13.02
6.	Una	92	3.66
7.	Bilaspur	102	3.12
8.	Hamirpur	0	0.00
9.	Reckon Peo	1283	10.01
10.	Rohru	215	7.48
11.	Shimla-9	176	5.60
12.	Solan	74	2.20
13.	Nahan	177	10.30
	Total:-	3488	90.87

Since water supply falls under essential service, first priority has been given to restore Water Supply promptly and all the damaged water supply schemes have been restored temporarily so that people are not put to inconvenience.

In order to repair /restore the damaged Water Supply and irrigation schemes permanently funds amounting to Rs. 90.87 lakhs shall be required for permanent restoration of all damaged schemes.

Total loss has been estimated till date as **Rs. 90.87 Crore.**
(Annexure-III)

6. **Electric Infrastructure:** The total loss has been assessed at **Rs. 9.13 Cr.** On this account, the details are at **Annexure-IV**

Cumulative Losses – Rs. 256.81 Crore

Sr. No.	Sectors	Losses(Rs In Crore)
1.	Human Loss	7.74
2.	Animal Loss	0.13
3.	Structure Loss	2.09
4.	Roads	146.84
5.	Water Supply Scheme	90.87
6.	Electric Infrastructure	9.14
Total		256.81

In view of large scale damages and losses, the allocation of Fund under SDRF for the year 2021-22 is insufficient to meet restoration of damages and losses. For current financial year, allocation of Rs. 363.00 crores has been made to State under SDRF, out of which 50% funds need for Covid-19 pandemic. Besides, 20% and 10% funds are also earmarked for Mitigation Fund and Capacity Building respectively. Actual funds available for relief and restoration works remains 20% which are highly insufficient

keeping in view the extent of damages and losses sustained during Winter Season-2022.

In view of the above, additional funds are needed out of NDRF to carryout necessary relief and restoration work of the damaged infrastructure in the hilly State.

Preparatory measures taken to prevent/reduce losses from disasters during this period:

- Hon'ble Chief Minister, Chief Secretary, Principal Secretary (Rev-DM) and Special Secretary (Rev-DM) monitored the Winter situation on daily basis.
- Winter Preparedness meeting held on 18-11-2021 under the Chairmanship of Chief Secretary, Himachal Pradesh with line departments and Deputy Commissioners.
- The State has released the SDRF funds to mitigate the disasters.
- The DEOCs were monitoring and reporting incidents/losses and damages regularly and the State EOC generated cumulative loss reports on daily basis.
- Control Rooms at SEOC/DEOCs are functioning round the clock.
- Weather forecast & early warning was regularly disseminated to all stakeholders by different means.
- Do's and Don'ts were broadcasted through electronic media about winter preparedness measures.
